

Application Guide: Multiroom Hybrid

Ideal for interfacing multiple racks or rooms with USB-enabled amplifiers onto an Ethernet network

The Powered by Crown application can be used to monitor and control amplifiers connected to a single USBX device, useful for real-time in-room adjustments.

Powered by Crown

Wifi Connection

*For Room 1 only!

Room 1

USB Connection

USB Connection

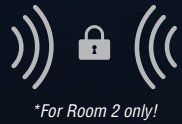

USBX

Ethernet Connection

Wired router should be configured as a DHCP server, giving IP addresses to each Ethernet connected USBX unit.

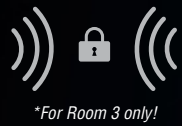

*For Room 2 only!

Room 2

USBX

*For Room 3 only!

Room 3

USBX

Each USBX device supports up to 8 USB-enabled Crown amplifiers.

Central Control Computer

Central computer should be hardwired via Ethernet to the wired router, and running the latest version of HiQnet Audio Architect software.
